Memberships (or part of their benefits) can be used, rolled over, rented, sold, bartered, borrowed, transferred, assigned to others During the memberships' 27 year term, members (if they wish) may at any time withdraw part or their entire investment in a composition of the above components which will vary depending on the trade/cash value ratio at the time of the withdrawal (see trade/cash value chart below). The memberships' sale price is scheduled to be increased annually at a 4.5% rate, in order to preserve their value.

<u>Trade/ cash value</u> is the redemption value of the memberships and their associated benefits if a member wish to withdraw. <u>Gross benefits</u> are the total services (accommodation/health/cash) given to the member. <u>Net benefits</u> are the difference between the gross benefits and the membership fee. <u>Forfeited value</u> is the value "lost" from the difference <u>between</u> gross benefits <u>and</u> the trade/cash value that is returned to the member upon withdrawal.

As it is obvious from the value of memberships chart flow, that although members are free to withdraw/cancel their membership at any time, the impact of the withdrawal in terms of forfeited value (both trade & cash) is significant. WellI club designed them so in order to reward loyalty ad achieve high utilization of the benefits, no matter if from the members or anyone they transfer their benefits to. In that way, the system created is stable and sustainable, and values are highly utilized, recycling, and enhanced overtime
